

# Design Doc for Personal Homepage

Name: Fan Zhou

## Description

The personal homepage project serves as a portfolio platform where the I can showcase my skills, projects, and experiences to visitors. Built using technologies such as HTML, CSS, and JavaScript, this responsive website aims to offer a visually engaging and informative overview of my professional background and expertise.

## User Stories

User Story 1 (Vicky):

As a visitor,

I want to easily navigate the homepage,

So that I can get a quick overview of the owner's profile.

User Story 2 (Jill):

As a visitor,

I want to access detailed project information,

So that I can understand the owner's expertise and experience.

User Story 3 (Mark):

As a visitor,

I want to easily find contact information,

So that I can connect with the owner for professional inquiries or networking.
